3DX-BOMB SUPPRESSION BLANKETS & SAFETY CIRCLES

The 3DX Bomb Blankets and Safety Circles are the most cost-effective and easy to use equipment currently available for containing fragments and shrapnel from explosive devices. They are in use by Armed Forces and Police units, as well as many large government and corporate offices, in many countries worldwide.

The Bomb Blanket & Safety Circle has been designed for use by both unskilled personnel as well as by skilled Explosive Ordnance Disposal (EOD) operators when confronted with a suspect explosive device in a public area. The Safety Circle is placed around the suspect bomb and then the Bomb Blanket, which has four heavy-duty webbing carrying handles, is carefully placed over the Safety Circle surrounding the bomb. This eliminates any direct contact with the bomb and provides a safe environment for its examination and disposal.

Should the bomb explode, the Safety Circle can help to direct the force of the bomb's explosion upwards, then the Bomb Blanket flexes and contains most of the bomb fragments. Two or more Safety Circles can be used together to contain larger bomb devices.

The lightweight, highly protective equipment is made of multiple-layer ballistic material and folds up into a compact, easily carried bag.

Bomb Blanket Size: 2m x 1.5m

NATO Stock No: 4240-99-811-9508

Product Specifications	Safety Circle 400M/S	Safety Circle 500M/S (hybrid)
Size	145cm x 40cm (length x height)	180cm x 40cm (length x height) / = diameter 55cm
Protection Level	V50 17 grain steel fragment @ 400 m/s	17 layer mix of Aramid & Ballistic Nylon V50 17 grain steel fragment @ 500 m/s
Weight (inc blanket)	18.4kg with Safety Circle (total packed)	25kg total packed including storage bag
